PORT OF SKAGIT

2017 Illicit Discharge / Connection Summary

1. March 14, 2017 – A vehicle operated by an employee of Clean Harbors Inc., left the road while travelling west on Ovenell Road and ended up in the drainage ditch. In the process of the accident the oil pan was ruptured and spilled approximately 2-3 gallons of motor oil onto the ground and into the ditch. Pursuant to the Port of Skagit's Emergency Spill Response Plan, Port staff quickly deployed multiple absorbent pads and booms to collect the oil and keep it from flowing downstream. Fire District 6 and Skagit County Department of Emergency Management (DEM) both responded to the scene. DEM notified Washington State Department of Ecology (DOE) through the spill hotline. The Port acted in a supportive role to assist in the clean-up. According to the DEM report dated March 14, 2017 DOE was considering the incident complete based on the actions taken.

2. In late 2017 Port of Skagit staff identified an interior floor drain inappropriately connected to the storm system in the Port-owned and tenant-occupied building located at 15426 Airport Drive, Suite B, Burlington, WA. The drain is in a staff-only area of the building, and collects and discharges melted water from the nearby ice machine and refrigeration unit. Based on information available it does not appear that any health-hazardous materials or pollutants are discharged into this drain; however, the Port is working to be proactive and correct the drain connection to ensure there are no future water quality issues resulting from pollutants entering the drain. The Port has engaged an engineering firm to assist with evaluating options and implementing actions to correct the situation.
